

Semi-Automatic Pearl Attaching Machine

The pearls are attached by pedal, with the help of a laser position marker, that allows the precise positioning of pearls. It is an easy to use and reliable equipment, that will guarantee the best final results.

Features

- 1 2 pedals for easy pearl attachment.
- 2 2 feeders that allow the quickly toggle between sizes.
- 3 Apply the pearls continuously, or one by one, to have a more precise positioning.
- 4 Matrices from 4mm to 10mm.
- 5 Laser position marker to precision positioning.
- 6 The "free-falling" feeding type solve the problem of blocking present in other systems.
- 7 Working table for better effectiveness.
- 8 Improve your efficiency, save costs and eliminates the issue of pearl falling.

Pearl sizes	from 4mm to 10mm
Colors and sizes	2 colors/sizes simultaneously
Maximum speed	150 pearls/minute
Material thickness	from 0.2mm to 1.2mm
Voltage	220V, Single-phase, 50/60Hz
Energy	50W
Pressure	6 to 8 bar
Dimensions	100x90x130cm / 90Kg
