- Set the desired length
- Set the desired number of sheets
- Cutting measurement in millimeters
- Hundreds of cuts with the same blade
- Cuts Transfer Paper, paper, plastic, vinyl, among others

Uses standard cutter blades

GEMfix XC

- 1 The GEMfix XC Cutters are the best option to quickly and accurately transform a roll into sheets in the desired length
- 2 Safe and easy to use. The operator doesn't have any contact with the machine in the cutting process
- 3 Fully programmable and adaptable to the needs of each job. The compact structure allow you to use it in small rooms without risk of accidents

Optionals

1 Second roll suport

- > Cut 2 rolls simultaneously
- > Same time, twice the production

2 End of course sensor

- > Detects the end of roll and shuts down automatically
- > Reduces energy consumption

3 Color sensor

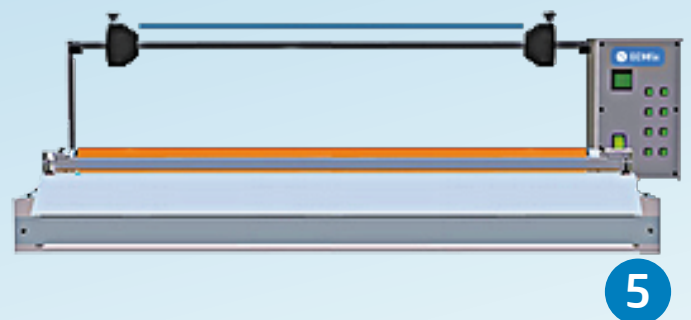

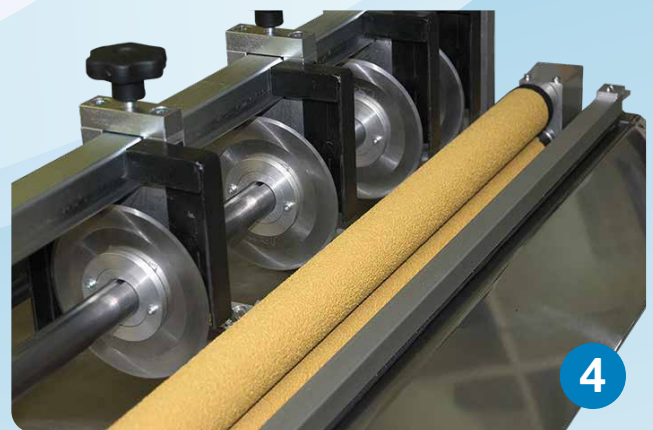

- > Ideal for printed rolls or with patterns, since allows you to use the pattern as a cutting mark

4 Circular blades

- > Move the blades to cut into even smaller sheets with a more perfect finish

5 Rolls width

- > Rolls from 55cm up to 200cm
- > We make this cutter with the width that you need
