

XC

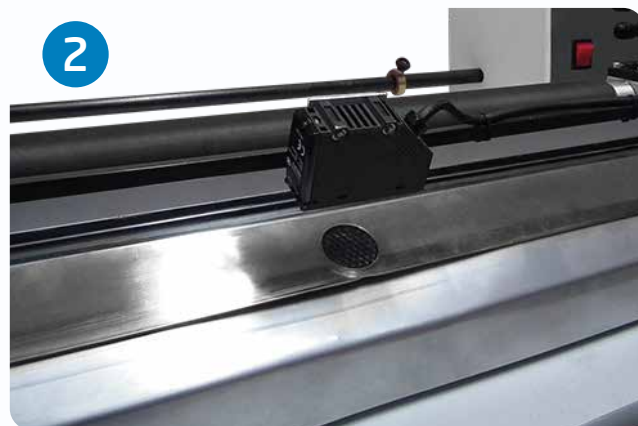

Roll to Sheet **Cutter**

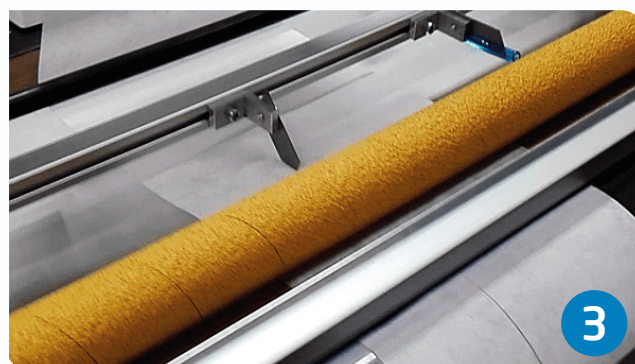

Uses standard cutter blades

Main Features

- ② Cuts rolls into sheets
- ② Cutting measurement in millimeters
- ② Set the desired length
- ② Hundreds of cuts with the same blade
- ② Set the desired number of sheets
- ② Cuts Transfer Paper, paper, plastic, vinyl, among others

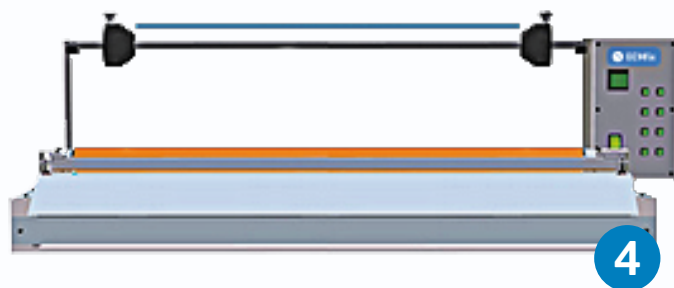

- ② The GEMfix XC Cutters are the best option to quickly and accurately transform a roll into sheets in the desired length
- ② Safe and easy to use. The operator doesn't have any contact with the machine in the cutting process
- ② Fully programmable and adaptable to the needs of each job. The compact structure allow you to use it in small rooms without risk of accidents

Optionals

- ① **Second roll support**
 - > Cut 2 rolls simultaneously
 - > Same time, twice the production
- ② **End of course sensor**
 - > Detects the end of roll and shuts down automatically
 - > Reduces energy consumption
- ④ **Longitudinal cutting**
 - > Perpendicular blades to the main blade. Allows to cut the roll in smaller sheets
- ⑤ **Rolls width**
 - > For rolls with width up to 157cm
 - > We make this cutter with the width that you need
