

TCH

Automatic Machine to
Apply **Nailheads**
with Prongs

Main Features

- ② Apply nailheads with prongs on textile and leather
- ② Detects missing nailheads
- ② Maximum Working Area: 450mm x 550mm
- ② Nailheads from 2mm to 8mm
- ② Automatic setting with high precision

Optional

Feeder

- > Choose the appropriate feeder for your designs and make drawings with different sizes, changing only the feeder.

Other Features

- ➊ Faster with less manual operations
 - > Fully automatic. The only manual operation is the replace of the material where the nailheads will be applied
- ➋ High quality precision
 - > Can always repeat the same pattern exactly as in the design
- ➌ Pedal for manual application

Compatible Software - GEM by Pulse (Minimum Level Creator)

- ➊ Produce your designs in minutes and send them to the GEMfix machine and embroidery machine simultaneously, greatly reducing production times.
- ➋ Open embroidery files (.dst) and easily combine embroidery with rhinestones.
